smittyyyy: Some people can
smittyyyy: Also artists are better at it
smittyyyy: Because y'all practice more
elskescape: But my vision also sucks >:((
elskescape: Yiis
smittyyyy: Buuuut visual acuity ≠ color reception
elskescape: I can tell the difference between the smallest of shades
smittyyyy: I have a more limited color spectrum
elskescape: these are different colours and a big difference but to most its a small difference or n
smittyyyy:
smittyyyy: I have protan/deuteranomaly
smittyyyy: So that represents what I can see
elskescape: ohh i see
smittyyyy: To me the first 3 have zero differences
smittyyyy: I can tell the 4th is slightly off
smittyyyy: The bottom middle two are identical to me too
smittyyyy: But the bottom last is pretty off
elskescape: the upper middle two are very similar except the left one is brighter and more hellow
sheebadreams: Red/green colorblind
smittyyyy: Identical to each other but noticeably off from original
smittyyyy: Yeah
smittyyyy: That's just the term for what I have
smittyyyy: Colorblindness comes in a few forms
sheebadreams: Normal for me

elskescape: the right one is more orange, warmer
smittyyyy: Yeah I can't see
smittyyyy: They're the same
sheebadreams: It is extremely rare to have monochromia
smittyyyy: Like zero difference
elskescape: colour is pretty
smittyyyy: The entire top row looks almost identical minus the last
smittyyyy: The last is ever so *slightly* off
sheebadreams:
smittyyyy: I can't actually tell exactly what is/isn't a good representation
sheebadreams: This is from a color test
sheebadreams: Can you see any of it?
elskescape: That test!
elskescape: I got a 0 from it im pretty sure which meant i could see more than average i got ever
smittyyyy: A lot of these are the same color. Is each box supposed to be different?
elskescape: Yis
sheebadreams: Yes same
smittyyyy: Lmfao
sheebadreams: Yep
smittyyyy: Then no
smittyyyy: The entire top looks to be the same color
sheebadreams: Red, greens, some blues and purples
smittyyyy: The second is almost entirely one color
smittyyyy: Like all the boxes
smittyyyy: The same
smittyyyy: The third I can see differences but a lot are the same to me
elskescape: Orko is first row second-third box, and 3rd and second of the end.
elskescape: Smitty is second last box of second row
elskescape: hydro is third row fourth from last
elskescape: And sheeb is fourth from last in fourth row or second in forth row
smittyyyy: Top: 2
smittyyyy: 2nd: 2
smittyyyy: 3rd: 4
smittyyyy: Bottom: 3
smittyyyy: That's how many colors per row
smittyyyy: That I see
smittyyyy: Like different colors
smittyyyy: Is every box different? Or is it a trick?
sheebadreams:
smittyyyy: What's the test?
smittyyyy: I'll take the official one
sheebadreams: https://www.xrite.com/hue-test
elskescape: :3 Thats my score too!
elskescape: I take it every year
sheebadreams: I took it because of my color theory class
sheebadreams: Results from 3 other tests

elskescape: Vision is so interesting to me and colour
sheebadreams: It helps me with color palettes, being able to tell the difference between colors
smittyyyy: Wtf
smittyyyy:
smittyyyy: I'm so confused
smittyyyy: It was hard to do most of those colors looked the same to me
elskescape: Red is incredibly low
smittyyyy: Yeah I'm mostly red colorblind
smittyyyy: But green too
smittyyyy: But yeah
smittyyyy: Clearly I'm not great at discerning it lol
smittyyyy: @Chat
smittyyyy: You try
smittyyyy: But yes, color has always been a struggle for me
elskescape: It just means i should be more careful in my designs so everyone can like them
sheebadreams: Try this test, I'm curious

smittyyyy: So y'all probably have more experience in deciphering colors

elskescape: Did grey do the test?
